Are You Ready for the HIPAA 5010 and ICD-10 Changes? We Can Help!

These teleconferences are designed to help you understand:

- your compliance responsibilities
- the key differences between the systems
- how the new requirements will impact your practice
- the proposed timeline and associated road map for successful implementation
- how your practice's implementation fits within larger efforts by other industry stakeholders (insurers, vendors and clearinghouses)
- how ICD-10 may provide value to your practice

These sessions will serve as a kick-off to the IMA's in-depth ICD-10 training. In 2011, to help you master the transition from ICD-9 to ICD-10, the IMA will provide a chapter by chapter review of ICD-10. These sessions will include review of the ICD-10 coding guidelines for each chapter and pre- and post-tests will expand the learning experience.

Special Members-Only Package Pricing!

Don't miss this opportunity to receive four hours of training on these important changes. IMA members and their staff can participate in both teleconferences for the members only price of **\$50**.
